In November, migratory birds have arrived in China's coastal areas. Shandong Province and the eastern coastal Zhejiang Province in East Asia - an important channel of Australia along migratory routes.

November 4 - 7 days, "China Green Times" reporter with the State Forestry Administration sent the first Steering Group, went to Shandong, Zhejiang and other migratory birds in autumn 2016 to carry out wildlife conservation supervision and inspection, to feel close to Shandong, Zhejiang for the birds safe migration effort.

Shandong:

Innovative approaches together through innovative bird protection

Mechanism innovation, management innovation, technological innovation, Qingdao City Shandong Province, bird protection "secrets."

Qingdao, co-established system of command of the city's bird protection work. The city encompasses wild birds protected by the joint meeting of all wild birds protected by the relevant departments and units, of fice located in the City Forestry Bureau. Through this platform, exchange of information between various departments, or ganization of work, command and control of bird protection action. Qingdao municipal government will work into the wildlife of the district government's scientific development appraisal system, to further clarify the main responsibility of the district municipal territorial management, the protection of wild birds rose from department to conduct government action.

In addition, Qingdao also use management and innovation, and assign responsibilities. Qingdao prepared the "Qingdao wild birds Protection Handbook", the implementation of grid management. "China Green Times" reporter saw open the manual, the terms of reference for each management area, the commitment unit, leaders in charge of specific personnel, means of communication at a glance. Each grid was responsible for solving the problem to find ways and means. Besides implementing the spring, autumn and winter bird protection actions, Qingdao regular inspections of key areas, interviews and admonish suspects, received reports from the timely investigation.

UAVs and ground patrol with bird protection is one of the highlights of Qingdao. Qingdao is also proud of this technological innovation is reflected.

Qingdao for Fushan, Kenneth Hill, Lee Chang Dongshan net birds prone areas, exploring the use of surveillance drones. A two crew members plus 1 rangers to complete the area of public security patrol. UAV flight speed of 20 meters per second, 360 ° viewing angle to make up for the shortage of human resources in the ground. "UAV role is to check the main image data which can be taken as valid evidence the air with the ground, to provide guidance and information to the ground, the job done efficiently and accurately. UAV was added to make a substantial forest work changes from the deployment of personnel to risk control, cost control from coverage to promote forest protection work depth effectively. "Geng, deputy director of Qingdao Municipal Forestry Bureau, said the dragon.

In Rongcheng large swan National Nature Reserve, China Central Television is here to connect live migratory birds program. Currently, the protected area management office with more than 30 full-time staff, and through cooperation with the relevant enterprises condominium together to protect the safety of protected areas big swan. Meanwhile, Rongcheng often organize forestry, industry and commerce, environmental protection, water conservancy, animal husbandry, agriculture and other sectors with the protected area management agencies to conduct joint law enforcement efforts to increase the protected area protection.

Zhejiang:

Innovative ideas, take the initiative to change their work ideas

As the hometown of Chinese breeding duck goose, Zhejiang domesticated wild animal breeding demonstration base, the geese and ducks breeding "demonstration base" and "Top Ten units" Zhejiang Haiyan Nison mallard breeding domesticated base "hiding" in a piece of rolling waters.

"China Green Times" reporter on the scene saw hordes of mallard, spot-billed duck or have fun at the imitation of the natural ecology of the pond, or relax on the shore peck hair. According to the person in charge of Zhou Jinliang introduced base, covering 345 acres of the base to provide high-quality seedlings annually to market duck 5 million, with an average purchase price of 72 yuan each. Base not only provide the community with duck seedlings, and provide aquaculture demonstration to farmers, such as rice duck Symbiosis Model, commodity bionic duck domesticated mode. "Breeding technology can effectively reduce the maturity of the people of the habit of prey game, changing everyone's ideas." Zhou Jinliang said.

The same will apply to the transformation of the development of ideas as well as the protection of birds Ningbo Hangzhou Bay National Wetland Park, this is the only wild birds shorebirds wetland habitat.

Wetland Park is located in the west of Hangzhou Bay Bridge, located in the river and the sea due to the intersection area, a large wetland waterfowl habitat here, the East Asian - Australian Flyway important post, is the world's endangered species Gull and bad cop wintering and stop one of the important migratory spoonbills, is one of the richest of the eastern coast of mainland winter waterfowl areas.

In 2011, promoted to National Wetland Park in Hangzhou Bay Ningbo City, Zhejiang Province and forestry sector to actively promote ecological science of combining natural and artificial restoration of land has been reclaimed restore the ecological environment. At present, the wetland park and a substantial increase in the number of bird species, 40 kinds of protection to be implemented by the project in front of 220 kinds now. In the Commonwealth of experts by the Wetlands International, the Global Environment centers with the

assistance of the Hangzhou Bay wetland waterfowl also built the unique climax stopover for migratory waders and wintering ducks provide a suitable living environment.

To enhance public awareness of the protection of migratory birds, wetland park in the country pioneered the 6D movie "migratory journey." "China Green Times" reporter sat in a special train entered the tunnel from the 13 3D screens to migratory birds, "Jia Jia" perspective weathered rain and snow through the baptism with the seat bumps shaking experience migratory birds from Siberia migrate all the way to Hangzhou Bay wetland whole process.

Zhejiang Provincial Forestry Department deputy director Wang Zhang Ming said that to ensure that the "clear network operations" effective, clear net bird protection in carrying out lar ge operations, forest police, law enforcement unit, timber inspection brigade of law enforcement of ficers, township cadres, party members and volunteers all over the province etc. have joined, as of November 4, the province dispatched a total of 2091 people, the elimination of gear 312.

Haiyan no independent forest public security authorities, but thanks to "1 10" linkage platform, including those responsible for forestry work in Agricultural Economics Of fice 14 a linkage system, the formation of rapid mechanism. County Public Security Bureau has set up a food and drug ring investigation brigade responsible for receiving reports from the public, in a timely manner according to the clues arranged action; Haining City , on the basis of preliminary investigation on in an operation on dispatching more than 100 people and arrested criminal suspects more than 20 people, and seized more than 1,000 kinds of wild birds, only played a significant deterrent.
